# SquadUp

System Overview

SquadUp is an app to make organizing sports activities easier by putting all the information that you need in one place. The app will allow you to connect with friends and organize activities such as pickup games by providing the ability to see how many people are scheduled at a location, and the ability to invite others.

Motive

The motive behind this app is to reduce the amount of time wasted while trying to set up sporting activities.

Future Plans

SquadUp is currently being developed to help organize playing basketball but we plan on including other sports and activities in the future. We also plan on expanding to other platforms such as iOS and Windows.

Current Issues

- Unorganized
- No guarantee that there will be people to play with when you arrive
- No guarantee of open gym when you arrive
- Can't easily invite friends to play with
- Can't see where other players are playing that night
